How do we approach this:

What is iPaaS?

According to Gartner, the criteria of an iPaaS vendor is as follows;

- ❖ Is a **cloud service**.
- ❖ Is available either by **subscription** or over internet technologies.
- ❖ Multiple message or **data delivery** styles such as batch, API-based, event-based, or message and data validation.
- ❖ Offers capabilities for executing **multiple integration** scenarios
- ❖ Allows **connectivity to different endpoints** that are both on-premises and cloud-based.
- ❖ Is designed to support **enterprise-class integration initiatives**.
